

Consew Heavy Duty Sewing Machine

Level 2

Features

- Reverse stitching
- Adjustable stitch length
- Thread sizes 46-207 (heavy duty thread, often made of nylon or polyester).
- The needle system is 135 x 17. Standard sewing machine needles will not work in this machine. Needle sizes range from sizes 16-24, with the most common needle size being 22. 135 x 16 Tri needles are used for sewing leather.
- Side-load bobbin winder

What You'll Need

- Fabric (canvas, denim, leather, etc.), notions, and interfacing needed for your sewing project.
- Basic heavy-duty nylon sewing thread in limited colors is available for use. Please plan to bring your own thread if specific colors or specialty thread is needed.

Please Note

- Turn off machine before threading or changing needles.
- It is strongly encouraged to reserve the equipment ahead of your visit to ensure availability.
